

Davide Di Matteo

Cyber Security Specialist

Rome, Italy / +39 346 134 5120 / davidedimatteo97@gmail.com
[dingo97.github.io](https://github.com/dingo97) / linkedin.com/in/davide-di-matteo / github.com/Dingo97

Cybersecurity professional working on critical infrastructure, vulnerability management and penetration testing. Experience in security assurance and Common Criteria evaluation, alongside independent vulnerability research.

EXPERIENCE

Aeroporti di Roma

Mar 2026 - Present

Cyber Security Specialist

- Coordinate a dedicated team across the vulnerability management lifecycle for airport systems.
- Manage VAPT within the Italian National Cybersecurity Perimeter (PSNC), including vendor engagement, remediation tracking and retesting.
- Support incident response with the CSOC and collaborate with Cyber Threat Intelligence teams.

Leonardo

Nov 2024 - Feb 2026

Cyber Security Assurance & Red Team

- Performed vulnerability assessments and penetration tests on INFOSEC systems and critical applications.
- Supported Common Criteria security evaluation, technical documentation and remediation plans in collaboration with the Security Evaluation Laboratory (LVS).

Sipal

Dec 2022 - Nov 2024

Cybersecurity Analyst / Ce.Va. Operator

- Analyzed security requirements and tested customer products for Common Criteria evaluations.
- Used static and dynamic analysis to identify vulnerabilities; worked with development teams on remediation and evaluation evidence.

SELECTED RESEARCH

CVE-2026-20516 / MediaTek

2026

Credited researcher for a confused-deputy issue in Android TV MiracastService (CVSS 5.5). Documented the ADB reproduction, trust boundary and demonstrated impact; coordinated disclosure with the vendor.

Linux anti-malware / Bachelor's thesis

2022

Compared seven Linux antivirus products using C and Python experiments in memory loading, process injection and self-injection. Documented the effect of encoding and packaging, with explicit limits on the historical lab results.

EDUCATION & CERTIFICATIONS

BSc in Computer Science / University of Rome Tor Vergata / 2016 - Oct 2022

Thesis: Analisi di sicurezza e capacità dei software Anti Malware su Linux.

Certified Ethical Hacker (CEH), EC-Council / earned Nov 2025

CompTIA Security+ / earned Oct 2017

TECHNICAL SKILLS & LANGUAGES

Practice: Vulnerability management, VAPT, security assurance, Common Criteria (ISO/IEC 15408).

Tools & code: Nessus, Burp Suite, Nmap, Wireshark, Linux; C, Python, Bash, PHP, SQL.

Languages: Italian (native), English (B2).
